Ido Siloni

Former Air Force shift manager. Now I build games and apps, with AI as my co-pilot.

Hod HaSharon, Israel ido.siloni@gmail.com ido-siloni.vercel.app github.com/Idosiloni

PROFILE

Three years leading 24/7 shifts in an Air Force communications unit, then ten units of cyber and computer science behind me and five projects of my own. I make decisions fast, document the rules I set for myself, and learn each new tool by shipping something real with it.

EXPERIENCE

Independent game & app builder · On my own, with AI as co-pilot — 2026 → now

- Built three Roblox games and two web apps from concept to launch, backed by design docs, balance simulators and automated tests.
- Learned the unglamorous parts of game development: economy balancing, anti-exploit checks and player analytics.

Shift Manager · Israeli Air Force, communications unit — 2021 → 2025

- Ran the shift in an operational air wing, with 24/7 coverage where mistakes weren't an option.
- Coordinated between departments and across ranks, working with several units at once.
- Led and trained the soldiers in my department. Enlisted and trained 2021–22, shift manager 2022–25.
- Outstanding Soldier (Jul 2023) and Wing-wide Excellence Program (Jul 2023).

Scouts instructor · "Gaash" troop, Hod HaSharon — 2015 → 2018

- Joined as a participant, became an instructor: leading a group and running a program.

PROJECTS

+1 Spin to Fly · Roblox, Luau. Spin on a gymnastics bar, let go and fly. 20 shoe tiers, 20 dismounts, 10 zones, about 18,700 lines of Luau, an anti-exploit Guard on every remote call, and pacing tuned in a Python simulator.

Fight To Steal · Roblox. Roll fighters, build a team of three, duel players and steal one. 850+ numbered design decisions, 10,000+ automated checks, 34 bugs found in one audit.

Lucky Ticket Tycoon · Roblox. Scratch tickets by hand, hire scratch-bots, rebirth for multipliers. 20 themed kiosks and about 15 server services, with the server owning every cash, odds and payout decision.

Chess Coach · Web, Stockfish (WASM). Free game review that teaches: three lessons per game with find-the-better-move drills. No backend, and games stay in the user's browser.

Family Cart · Web, Firebase. Shared shopping list that syncs live and sorts items in store-walking order. Hebrew-first, installable, about 1,600 lines with no framework.

EDUCATION

Hadarim High School — 2018 → 2021

Hod HaSharon · full matriculation

- 10 units of cyber and computer science
- 5 units each in math, physics and English
- Certificate of excellence, 2021

SKILLS

Languages	Hebrew (native), English (fluent)
Code	Luau, Python, JavaScript, Java, HTML + CSS
Tools	Roblox Studio, Firebase, Vercel, Git, Claude Code
Strengths	Leadership, staying calm under pressure, learning new tools fast
Off duty	Volleyball, CrossFit, basketball, gaming
